Art Unit: 1614

Claims 15-36 are presented for examination.

Applicant's response filed June 17, 2005 has been received and entered.

Accordingly, the rejection made under obviousness-type double patenting as set forth in the previous Office action dated March 17, 2005 at page 2 and 3 is hereby withdrawn because copending application no. 10/371,685 is now abandoned.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-36 are again rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for accelerating the growth rate of a prematurely-born human infant with triheptanoic, does not reasonably provide enablement for all seven carbon fatty acids (straight or branched chain of seven carbons with any substitution), 4-methylhexanoic, 4-methylhexenoic, 3-hydroxy-4-methylhexanoic, 5-methylhexanoic, 5-methylhexenoic and 3-hydroxy-5-methylhexanoic. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or the invention commensurate in scope with these claims.

In this regard, the application disclosure and claims have been compared per factors indicated in the decision In re Wands, 8 USPQ2d 1400 (Fed. Cir., 1988) as to undue experimentation.

The factors include:

Art Unit: 1614

- 1) the quantity of experimentation necessary
- 2) the amount of direction or guidance provided
- 3) the presence or absence of working examples
- 4) the nature of the invention
- 5) the state of the art
- 6) the relative skill of those in the art
- 7) the predictability of the art and
- 8) the breadth of the claims

The instant specification fails to provide guidance that would allow the skilled artisan background sufficient to practice that instant invention without resorting to undue experimentation in view of further discussion below.

Applicant's remarks regarding the discussion of the eight factors of the In re Wands analysis were not addressed are not persuasive since each factor was discussed individually to set the claims disclosed in the application, the one skilled in the art whom recognize the instant invention, and the unpredictability of the invention with the administration of seven-carbon fatty acid to accelerate the growth rate of a prematurely-born human infant.

Again, applicant's claims are very broad to accelerate the growth rate of a prematurely-born human infant with any seven-carbon fatty acid.

Again, applicant provided a working example in the instant specification showing the administration of a triheptanoin-supplemented formula only to an infant in its current scope.

Again, with regard to the quantity of experimentation needed to make or use the invention based upon the content of the disclosure, the level of experimentation needed based on the unpredictable nature of the invention and the extreme breadth of the claims, one skilled in the art could not use the claimed invention without undue experimentation.

The rejection made under 35 USC 112, first paragraph is adhered to.

Claims 15-36 are not allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
